

K-Love seves my family for positive programmming we cann not get on any other station. The San antonio and Austin areas would be adversely affected by not having K-Love available. I know the founder of 91.3 and his vision for this radio station. It was a local station and he knew he grew this station as far as he was capable. He dicision to sell to K-Love was becasuse he knew they could not only continue what he stated but could take his vision much further than he could as a local owner operated station. Do not expand the LPFM stations to take priority over current FM translator services.
